

Trần Vũ Thiện

Software Development Engineer

0942457820 | tranvuthien1708@gmail.com | Hanoi

CAREER OBJECTIVE

Software Engineer with experience in developing web applications using Java Spring Boot, Angular, and Oracle/MySQL. Experienced in working in enterprise environments, developing backend and frontend features, processing ETL data, writing optimized SQL queries, and coordinating acceptance testing with relevant outsourcing partners. Seeking to grow toward a Full-Stack Developer / Distributed Systems Engineer career path.

SKILLS

Backend: Java, Spring Boot, REST API, Hibernate, JPA

Frontend: Html, CSS, Angular

Database: Oracle, MySQL, Cassandra, MinIO

Messaging / Integration: Kafka, gRPC, Redis

Tools: Git, SVN, Postman, IDE, AI Coding Agents, Pentaho Spoon,...

EDUCATION

Electronics and Communications Engineering Technology — VNU University of Engineering and Technology 08/2018 - 06/2022

Major: Electronics and Telecommunications Engineering (Advanced Program)

WORK EXPERIENCE

Software Development Engineer — Viettel Telecom 08/2024 - Present

- Developed backend and frontend features for internal business support systems using Java Spring Boot, Angular, and Oracle Database.
- Participated in data processing and built ETL pipelines to support internal applications.
- Wrote and optimized SQL queries to efficiently retrieve and process data from databases.
- Coordinated with stakeholders to manage, test, and conduct acceptance of deliverables provided by outsourcing partners.
- Contributed to the integration and operation of scalable backend components and technologies such as gRPC, Kafka, and Redis.

Java Web Developer — Migi Technology 01/2023 - 07/2024

- Developed both Backend and Frontend using Java Spring Boot, Angular, and MySQL for various web applications in school management and e-commerce.
- Designed and implemented RESTful APIs to handle core business logic and data processing for multiple client projects.
- Worked directly with clients and project stakeholders to gather requirements, estimate effort, and deliver features on schedule.

Java Intern — HCLTech Vietnam 03/2022 - 12/2022

- Learned full-stack web application development using Java Spring Boot combined with Angular. Participated in company training activities and programs.
- Practiced building REST APIs with Spring Boot and connecting them to relational databases.
- Gained hands-on experience with Angular fundamentals, including components, services, and routing.

PROJECT EXPERIENCE

Viettel Telecom – Commission Payment System

08/2024 – Present

Technologies: Java Spring Boot, Oracle Database, Pentaho (ETL)

- Maintained and enhanced Backend services for the commission payment system using Spring Boot.
- Developed and maintained ETL workflows using Pentaho Spoon to extract, transform, and load business data for reporting and internal systems.
- Coordinated with and reviewed deliverables from outsourced partners, ensuring compliance with business requirements and technical standards.

Dashboard for the Ministry of Education and Sports of Laos

04/2024 – 07/2024

Technologies: Java Spring Boot, Angular, MySQL

- Developed both Backend APIs and Frontend interfaces for key modules such as Account Management and School Management,...
- Designed RESTful APIs using Spring Boot to handle business logic, and data processing.
- Implemented dynamic UI components using Angular.
- Wrote and optimized SQL queries in MySQL to retrieve and process system data efficiently.

E-commerce & Online Examination System (Ulearn)

05/2023 – 03/2024

Technologies: Java Spring Boot, Angular, MySQL

- Built and maintained full-stack features for modules including Course Topic Management, Seller Course Management, and Course Library.
- Designed RESTful APIs using Spring Boot to handle business logic, and data processing.
- Implemented dynamic UI components using Angular.
- Wrote and optimized SQL queries in MySQL to retrieve and process system data efficiently.

School Management System (LaosEdu)

01/2023 – 04/2023

Technologies: Java Spring Boot, Angular, MySQL

- Developed both Backend and Frontend features for the School Management module, covering school and class data management.
- Developed the Exam & Score Management module, allowing teachers and administrators to manage exams, input, and track student scores.
- Designed RESTful APIs using Spring Boot to handle business logic and data processing for these modules.
- Wrote and optimized SQL queries in MySQL to retrieve and process system data efficiently.
