Trần Vũ Thiện

Software Development Engineer

0348741230 Zalo: 0942457820 tranvuthien1708@gmail.com Hanoi

CAREER OBJECTIVE

Software Engineer with experience in developing web applications using Java Spring Boot, Angular, and Oracle/MySQL. Experienced in working in enterprise environments, developing backend and frontend features, processing ETL data, writing optimized SQL queries, and coordinate acceptance testing with relevant outsourcing partners.. Seeking to grow toward a Full-Stack Developer / Distributed Systems Engineer career path.

SKILLS

Backend	Java, Spring Boot, REST API
Frontend	Html, CSS, Angular
Database	Oracle, MySQL
Messaging / Integration	Kafka, gRpc, Redis
Tools	Git, SVN, Postman, IDE, AI Coding Agents, Pentaho Spoon,...

EDUCATION

VNU University of Engineering and Technology 08/2018 - 06/2022

Electronics and Communications Engineering Technology

Major: Electronics and Telecommunications Engineering (Advanced Program)

WORK EXPERIENCE

Viettel Telecom 08/2024 - Present

Software Development Engineer

Developed backend and frontend features for internal business support systems using Java Spring Boot, Angular, and Oracle Database.
Participated in data processing and built ETL pipelines to support internal applications.
Wrote and optimized SQL queries to efficiently retrieve and process data from databases.
Coordinated with stakeholders to manage, test, and conduct acceptance of deliverables provided by outsourcing partners.
Contributed to the integration and operation of scalable backend components and technologies such as gRPC, Kafka, and Redis.

Migi Technology 01/2023 - 07/2024

Java Web Developer

Developed both Backend and Frontend using Java Springboot, Angular, and MySQL for various web applications in school management and e-commerce.

HCLTech Vietnam 03/2022 - 12/2022

Java Intern

Learned full-stack web application development using Java Spring Boot combined with Angular. Participated in company training activities and programs.

PROJECT EXPERIENCE

Viettel Telecom – Commission Payment System

Duration: 08/2024 – Present

Technologies: Java Spring Boot, Oracle Database, Pentaho (ETL)

- Maintained and enhanced Backend services for the commission payment system using **Spring Boot.**
- Developed and maintained **ETL workflows using Pentaho Spoon** to extract, transform, and load business data for reporting and internal systems.
- Coordinated with and reviewed deliverables from outsourced partners, ensuring compliance with business requirements and technical standards.

Dashboard for the Ministry of Education and Sports of Laos

Duration: 04/2024 – 07/2024

Technologies: Java Spring Boot, Angular, MySQL

- Developed both **Backend APIs and Frontend interfaces** for key modules such as Account Management and School Management,...
- Designed RESTful APIs using **Spring Boot** to handle business logic, and data processing.
- Implemented dynamic UI components using **Angular.**
- Wrote and optimized **SQL queries** in MySQL to retrieve and process system data efficiently.

E-commerce & Online Examination System (Ulearn)

Duration: 05/2023 – 03/2024

Technologies: Java Spring Boot, Angular, MySQL

- Built and maintained full-stack features for modules including Course Topic Management, Seller Course Management, and Course Library.
- Designed RESTful APIs using **Spring Boot** to handle business logic, and data processing.
- Implemented dynamic UI components using **Angular.**
- Wrote and optimized **SQL queries** in MySQL to retrieve and process system data efficiently.
